WO 2005/047408 A1

(54) Title: A PAINT PRODUCT AND METHOD OF MANUFACTURE

(57) Abstract: The present invention discloses a new paint coating product produced by the combination of paint residue separated from a waste stream of wash solvents and combined with a hardening agent and other additives as desired for specific applications. The present invention also discloses a process of producing a surface coating wherein the paint residue is derived from a waste stream of wash solvents by the process of distillation.
